Push Notifications

Hade Currency Push Notification Body

```
-- Retrieve format string with following
SELECT TextValue
FROM dbo.Q2_UiTextView
WHERE ShortName = 'HadeCurrencyNotifPushBody';
```

Default format string:

```
Your {0} for account ending in {7} is {3} {9:C}.
```

Values:

- {0} = hade description
- {1} = hade data type
- {2} = hade short name
- {3} = long operand ("greater than", "less than", "equal to")
- {4} = short operand (GT, LT, EQ)
- {5} = account description
- {6} = Push disclaimer
- {7} = last x digits of account number (see system property AlertNotificationAccountEndingInLength)
- {8} = hade value
- {9} = comparison value
- {10} = created user's firstname
- {11} = created user's middle name
- {12} = created user's last name
- {13} = created user's salutation
- {14} = created user's suffix
- {15} = FName AdminSettings.GetFiRecord().FName
- {16} = Current Date Time (add formatting)

Posted Transaction Push Notification Item Detail Format

Allows formatting of item details--transaction details--for inclusion in the Push Notification Message body.

```
-- Retrieve format string with following
SELECT TextValue
FROM dbo.Q2_UiTextView
WHERE ShortName = 'PostedTransactionNotificationPushItemDetailFormat';
```

Default format string:

```
(an empty string)
```

Values:

- {0} = BaiCode
- {1} = CheckNumber
- {2} = CheckNumberNumeric
- {3} = CleanedDescription
- {4} = Description
- {5} = DisputeStatus
- {6} = DorC
- {7} = HostTranNumber
- {8} = ImageNumber
- {9} = PostDate
- {10} = RunningBalance
- {11} = SignedTxnAmount
- {12} = StatementDescription
- {13} = TxnAmount

Posted Transaction (with Memos) Push Notification Message Body

Only valid if [host memos are set to be included in alerts](#).

```
-- Retrieve format string with following
SELECT TextValue
FROM dbo.Q2_UIView
WHERE ShortName = 'PostedPlusMemoTransactionNotificationPushMessageBody';
```

Default format string

(an empty string)

Values:

- {0} = account description
- {1} = Push disclaimer
- {2} = last x digits of account number (see system property AlertNotificationAccountEndingInLength)
- {3} = memo item count
- {4} = posted item count
- {5} = sum of both memo and posted item amounts
- {6} = comparison value
- {7} = posted transaction alert type description (Debit Transaction/Credit Transaction/Check Number/Description)
- {8} = created user's firstname
- {9} = created user's middle name
- {10} = created user's last name
- {11} = created user's salutation
- {12} = created user's suffix
- {13} = FiName AdminSettings.GetFiRecord().FiName
- {14} = Current Date Time (add formatting)
- {15} = PostedTransactionNotificationPushItemsHeader
- {16} = Item details using PostedTransactionNotificationPushItemDetailFormat as the formatter

Posted Transaction (no Memos) Push Notification Message Body

Only valid if [host memos are NOT set to be included in alerts](#).

```
-- Retrieve format string with following
SELECT TextValue
FROM dbo.Q2_UIView
WHERE ShortName = 'PostedTransactionNotificationPushBody';
```

Default format string

{3} item(s) matched the {6} criteria for your account ending in {2}.

Values:

- {0} = account description
 - {1} = Push disclaimer
 - {2} = last x digits of account number (see system property AlertNotificationAccountEndingInLength)
 - {3} = item count
 - {4} = sum of item amounts
 - {5} = comparison value
 - {6} = posted transaction alert type description (Debit Transaction/Credit Transaction/Check Number/Description)
 - {7} = created user's firstname
 - {8} = created user's middle name
 - {9} = created user's last name
 - {10} = created user's salutation
 - {11} = created user's suffix
 - {12} = FiName AdminSettings.GetFiRecord().FiName
 - {13} = Current Date Time (add formatting)
 - {14} = PostedTransactionNotificationPushItemsHeader
 - {15} = Item details using PostedTransactionNotificationPushItemDetailFormat as the formatter
-

Secure Message

Hade Currency Secure Message Subject

```
-- Retrieve format string with following
SELECT TextValue
FROM dbo.Q2_UIView
WHERE ShortName = 'HadeCurNotifSecMsgSubject';
```

Default format string

Account Alert Notification for {1}

Values:

- {0} = hade description
- {1} = masked account number
- {2} = account description

Hade Currency Secure Message Body

```
-- Retrieve format string with following
SELECT TextValue
FROM dbo.Q2_UIView
WHERE ShortName = 'HadeCurNotifSecMsgBody';
```

Default format string

This is your requested {0} alert notification. Your {0} is {3} your specified alert value of {6:C} for your {8} account {7}. As this is an automated reminder, please do not reply to this email.

Values:

- {0} = hade description
- {1} = hade data type
- {2} = hade short name
- {3} = long operand ("greater than", "less than", "equal to")
- {4} = short operand (GT, LT, EQ)
- {5} = hade value
- {6} = comparison value
- {7} = masked account number
- {8} = account description
- {9} = created user's firstname
- {10} = created user's middle name
- {11} = created user's last name
- {12} = created user's salutation
- {13} = created user's suffix
- {14} = FiName AdminSettings.GetFiRecord().FiName
- {15} = Current Date Time (add formatting)

Posted Transaction Secure Message Item Detail Format

Allows formatting of item details--transaction details--for inclusion in the Secure Message body.

```
-- Retrieve format string with following
SELECT TextValue
FROM dbo.Q2_UiTextView
WHERE ShortName = 'PostedTransactionNotificationSecureMessageItemDetailFormat';
```

Default format string

(null text value)

Values:

- {0} = BaiCode
- {1} = CheckNumber
- {2} = CheckNumberNumeric
- {3} = CleanedDescription
- {4} = Description
- {5} = DisputeStatus
- {6} = DorC
- {7} = HostTranNumber
- {8} = ImageNumber
- {9} = PostDate
- {10} = RunningBalance
- {11} = SignedTxnAmount
- {12} = StatementDescription
- {13} = TxnAmount

Posted Transaction Secure Message Subject

```
-- Retrieve format string with following
SELECT TextValue
FROM dbo.Q2_UiTextView
WHERE ShortName = 'PostedTransactionNotificationSecureMessageSubject';
```

Default format string

Posted Transaction Alert Notification - {2} Search

Values:

- {0} = masked account number
- {1} = account description
- {2} = posted transaction alert type description (debit/credit/check#/description)

Posted Transaction (with Memos) Secure Message Body

Only valid if [host memos are set to be included in alerts](#).

```
-- Retrieve format string with following
SELECT TextValue
FROM dbo.Q2_UIView
WHERE ShortName = 'PostedPlusMemoTransactionNotificationSecureMessageBody';
```

Default format string

This is your requested transaction alert notification for your {1} account {0}. There were {3} pending item(s) and {4} posted items with a total amount of {5} that matched your {2} search criteria. As this is an automated reminder, please do not reply to this email.

Values:

- {0} = masked account number
- {1} = account description
- {2} = alert type description
- {3} = memo tran count
- {4} = posted tran count
- {5} = memo tran + posted tran total amount
- {6} = alert comparison value
- {7} = user first name
- {8} = user middle name
- {9} = user last name
- {10} = user salutation
- {11} = user suffix
- {12} = fi name
- {13} = current datetime
- {14} = item detail format string
- {15} = item details

Posted Transaction (no Memos) Secure Message Body

Only valid if [host memos are NOT set to be included in alerts](#).

```
-- Retrieve format string with following
SELECT TextValue
FROM dbo.Q2_UIView
WHERE ShortName = 'PostedTransactionNotificationSecureMessageBody';
```

Default format string

This is your requested transaction alert notification for your {1} account {0}. There were {3} item(s) with a total amount of {4:C} that matched your {2} search criteria. As this is an automated reminder, please do not reply to this email.

Values:

- {0} = masked account number
- {1} = account description
- {2} = transaction alert type description
- {3} = item count
- {4} = sum of item amounts

- {5} = comparison value
- {6} = user firstname
- {7} = user middle name
- {8} = user last name
- {9} = user salutation
- {10} = user suffix
- {11} = Fi Name
- {12} = Current Date Time (add formatting)
- {13} = item detail format string
- {14} = Item details

Voice Notifications

Hade Currency Notification Subject

- {15} = Item Details using above format string

SMS Notifications

HADE Currency Sms Subject

None

HADE Currency Sms Body

```
-- Retrieve format string with following
SELECT TextValue
FROM dbo.Q2_UiTextView
WHERE ShortName = 'HadeCurrencyNotifSmsBody';
```

Default format string

This is your requested account alert notification. Additional details are available online.

Values:

- {0} = hade description
- {1} = hade data type
- {2} = hade short name
- {3} = long operand ("greater than", "less than", "equal to")
- {4} = short operand (GT, LT, EQ)
- {5} = account description
- {6} = sms disclaimer
- {7} = last x digits of account number (see system property AlertNotificationAccountEndingInLength)
- {8} = hade value
- {9} = comparison value
- {10} = created user's firstname
- {11} = created user's middle name
- {12} = created user's last name
- {13} = created user's salutation
- {14} = created user's suffix
- {15} = FiName AdminSettings.GetFiRecord().FiName
- {16} = Current Date Time (add formatting)

Posted Transaction SMS Item Detail Format

PostedTransactionNotificationSmsItemDetailFormat built for each item and appended into a string

```
-- Retrieve format string with following
SELECT TextValue
FROM dbo.Q2_UiTextView
WHERE ShortName = 'PostedTransactionNotificationSmsItemDetailFormat';
```

Default format string

(null text value)

Values:

- {0} = BaiCode
- {1} = CheckNumber
- {2} = CheckNumberNumeric
- {3} = CleanedDescription
- {4} = Description
- {5} = DisputeStatus
- {6} = DorC
- {7} = HostTranNumber
- {8} = ImageNumber
- {9} = PostDate
- {10} = RunningBalance
- {11} = SignedTxnAmount
- {12} = StatementDescription
- {13} = TxnAmount

Posted Transaction (with Memos) SMS Message Body

Only valid if [host memos are set to be included in alerts](#).

```
-- Retrieve format string with following
SELECT TextValue
FROM dbo.Q2_UiTextView
WHERE ShortName = 'PostedPlusMemoTransactionNotificationSmsMessageBody';
```

Default format string

Notification for account ending in {2}: {3} pending and {4} posted item(s) matched the {7} criteria. Log on for additional details.

Values:

- {0} = account description
- {1} = sms disclaimer
- {2} = last x digits of account number (see system property AlertNotificationAccountEndingInLength)
- {3} = memo item count
- {4} = posted item count
- {5} = sum of both memo and posted item amounts
- {6} = comparison value
- {7} = posted transaction alert type description (Debit Transaction/Credit Transaction/Check Number/Description)
- {8} = created user's firstname
- {9} = created user's middle name
- {10} = created user's last name
- {11} = created user's salutation
- {12} = created user's suffix
- {13} = FiName AdminSettings.GetFiRecord().FiName
- {14} = Current Date Time (add formatting)
- {15} = PostedTransactionNotificationSmsItemsHeader
- {16} = Item details using PostedTransactionNotificationSmsItemDetailFormat as the formatter

Posted Transaction (no Memos) SMS Message Body

Only valid if [host memos](#) are **NOT** set to be included in alerts.

```
-- Retrieve format string with following
SELECT TextValue
FROM dbo.Q2_UiTextView
WHERE ShortName = 'PostedTransactionNotificationSmsBody';
```

Default format string

Notification for account ending in {2}: {3} item(s) matched the {6} criteria. Log on for additional details.

Values:

- {0} = account description
- {1} = sms disclaimer
- {2} = last x digits of account number (see system property AlertNotificationAccountEndingInLength)
- {3} = item count
- {4} = sum of item amounts
- {5} = comparison value
- {6} = posted transaction alert type description (Debit Transaction/Credit Transaction/Check Number/Description)
